Detailed Action

The Final Rejection at paper no. 15 is withdrawn in light of discovery of a new 103 (a) reference. The 112, first paragraph rejections of claims 17 and 24-27, the 112, second paragraph rejection of claims 17, 24, 25, 26, and 27 are withdrawn in light of applicant's remarks and amendment at paper no. 16c.

(new rejection)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ninomiya et. al.. (See Reference A).

Ninomiya et. al. teaches the process of preparing 4-Pyridinecarboxylic acid which comprises refluxing 4-pyridinecarboxylic acid, hydrazide with ethanol to produce a solution with an acyl compound to obtain the product. The difference between the prior art process and the Ninomiya process is the teaching of the production of a mole ratio of the carbonyl compound to the final product compound, 4-Pyridinecarboxylic acid in the instant process and not in the Ninomya process. It would have been obvious to one of ordinary skill in the art to synthesize 4-Pyridinecarboxylic acid in a mole ration of 1.00 to 1.67 to the carbonyl compound. Accordingly, the

Art Unit: 1625

compounds are deemed unpatentable therefrom in the absence of a showing of unexpected chemical results for the claimed process.

Claims 25-27 are objected to because they are based on a rejected claim.
